For readers of such crusading works of nonfiction as Katherine Boo's *Beyond the Beautiful* and Tracy Kidder's *Mountains Beyond Mountains* comes a powerful and captivating examination of two entwined global crises: environmental destruction and human trafficking—and an inspiring, bold plan for how we can solve them. A leading expert on modern-day slavery, Kevin Bales has traveled to some of the world's most dangerous places documenting and battling human trafficking. In the course of his reporting, Bales began to notice a pattern emerging: Where slavery existed, so did massive, unchecked environmental destruction. But why? Bales set off to find the answer in a fascinating and moving journey that took him into the lives of modern-day slaves and along a supply chain that leads directly to the cellphones in our pockets. What he discovered is that even as it destroys individuals, families, and communities, new forms of slavery that proliferate in the world's lawless zones also pose a grave threat to the environment. Simply put, modern-day

slavery is destroying the planet. The product of seven years of travel and research, *Blood and Earth* brings us dramatic stories from the world's most beautiful and tragic places, the environmental and human-rights hotspots where this crisis is concentrated. But it also tells the stories of some of the most common products we all consume—from computers to shrimp to jewelry—whose origins are found in these same places. *Blood and Earth* calls on us to recognize the grievous harm we have done to one another, put an end to it, and recommit to repairing the world. This is a clear-eyed and inspiring book that suggests how we can begin the work of healing humanity and the planet we share. Praise for *Blood and Earth* —A heart-wrenching narrative . . . Weaving together interviews, history, and statistics, the author shines a light on how the poverty, chaos, wars, and government corruption create the perfect storm where slavery flourishes and environmental destruction follows. . . . A clear-eyed account of man's inhumanity to man and Earth. Read it to get informed, and then take action. —Kirkus Reviews (starred review) —[An] exposé of the global economy's "deadly dance" between slavery and environmental disaster . . . Based on extensive travels through eastern Congo's mineral mines, Bangladeshi fisheries, Ghanaian gold mines, and Brazilian forests, Bales reveals the appalling truth in graphic detail. . . . Readers will be deeply disturbed to learn how the links connecting slavery, environmental issues, and modern convenience are forged. —Publishers Weekly —This well-researched and vivid book studies the connection between slavery and environmental destruction, and what it will take to end both. —Shelf Awareness (starred review) —This is a remarkable book, demonstrating once more the deep links between the ongoing degradation of the planet and the ongoing degradation of its most vulnerable people. It's a bracing reminder that a mentality that allows throwaway people also allows a throwaway earth. —Bill McKibben, author of *Eaarth: Making a Life on a Tough New Planet*

Presents fantasy stories written by Internet authors that explore how people, cultures, and societies are affected by the predictions of the Machine, an object that provides short yet vague phrases about how a person will die.

Pattern Recognition - a pulsating techno-thriller by William Gibson, bestselling author of *Neuromancer* Cayce Pollard has been flown to London. She's a 'coolhunter' - her services for hire to global corporations desperate for certainty in a capricious and uncertain world. Now she's been offered a special project: track down the makers of the addictive online film that's lighting up the 'net. Hunting the source will take her to Tokyo and Moscow and put her in the sights of Japanese computer crazies and Russian Mafia men. She's up against those who want to control the film, to own it - who figure breaking the law is just another business strategy. The kind of people who relish turning the hunter into the hunted . . . William Gibson is a prophet and a satirist, a black comedian and an outstanding architect of cool. Readers of Neal Stephenson, Ray Bradbury and Iain M. Banks will love this book. *Pattern Recognition* is the first novel in the Blue Ant trilogy - read *Spook Country* and *Zero History* for more. 'A big novel, full of bold ideas . . . races along like an expert thriller' GQ 'Dangerously hip. Its dialogue and characterization will amaze you. A wonderfully detailed, reckless journey of espionage and lies' USA Today 'A compelling, humane story with a sympathetic heroine searching for meaning and consolation in a post-everything world' Daily Telegraph *Idoru* is a gripping techno-thriller by William Gibson, bestselling author of *Neuromancer* 'Fast, witty and cleverly politicized' Guardian

Poems.

This article seeks to define "water culture" in Roman society by examining literary, epigraphic, and archaeological evidence, while understanding modern

trends in scholarship related to the study of Roman water.

The Air Force Special Operations Command (AFSOC) special tactics community is a small, tight-knit brotherhood of proficient and committed warriors, consisting of special tactics officers and combat controllers, combat rescue officers and pararescuemen, and officer and enlisted special operations weathermen. These warriors have consistently proven themselves to be an invaluable force multiplier throughout history in conflicts around the world. This is their story.--Provided by publisher.

Where did the Aryans come from originally? Did they invade India? Or were they actually Indian invaders who colonized Greece? In *India in Greece*, E. Pococke explores the theory that the Aryans may have originally travelled from India to Greece, colonized the latter and influenced the culture there. Centuries later, they came back to India. Covering topics as diverse as the sources of the Hellenic Race, the colonization of Egypt and Palestine, the wars of the Grand Lama and the Bud'hist propaganda in Greece, the author tries to show that at some point in history, India and Greece were closely associated.

Alejandro de la Fuente and George Reid Andrews offer the first systematic, book-length survey of humanities and social science scholarship on the exciting field of Afro-Latin American studies. Organized by topic, these essays synthesize and present the current state of knowledge on a broad variety of topics, including Afro-Latin American music, religions, literature, art history, political thought, social movements, legal history, environmental history, and ideologies of racial inclusion. This volume connects the region's long history of slavery to the major political, social, cultural, and economic developments of the last two centuries. Written by leading scholars in each of those topics, the volume provides an introduction to the field of Afro-Latin American studies that is not available from any other source and reflects the disciplinary and thematic richness of this emerging field.

Described by Bob Holman as "Li Po in drag, the voice of New America," Koon Woon exploded onto the poetry scene in the late 1990s. Largely self-taught, and struggling with both mental illness and homelessness, Seattle-based Woon wrote about the back alleys and tenement rooms on the margins of immigrant culture. His first collection, "The Truth in Rented Rooms" (included in this volume), won a PEN poetry prize and earned praise from Lawrence Ferlinghetti and Garrison Keillor. "Water Chasing Water" is Woon's second collection, and continues his exploration of loneliness and memory with poems and essays that seek out "This light / Without which existence is not detectable."
