In this issue of Heart Failure Clinics, guest editors Drs. Ragavendra R Baliga and George A. Mensah bring their considerable expertise to the topic of Translational Research in Cardio-Oncology. Top experts in the field cover key topics such as radiation-induced cardiac dysfunction; training and career development; cardiovascular imaging; CAR-T cell therapy and cardiovascular disease; and more. Contains 12 relevant, practice-oriented topics including cardio-protection of high-risk individuals; myocardial metabolism; amyloidosis; arrhythmic complications associated with cancer therapies; and more. Provides in-depth clinical reviews on translational research in cardio-oncology, offering actionable insights for clinical practice. Presents the latest information on this timely, focused topic under the leadership of experienced editors in the field. Authors synthesize and distill the latest research and practice guidelines to create clinically significant, topic-based reviews.

This issue of Primary Care: Clinics in Office Practice features expert clinical reviews on Sports Medicine which includes current information on updates, advances, and controversies, on topics such as the evaluation and treatment of head injuries, neck injuries, back injuries in the adult and pediatric athletic population, foot and ankle injuries, knee injuries, hip and groin injuries, shoulder injuries, elbow injuries, hand and wrist injuries, overuse injuries, sports nutrition, and ergogenic aids.

This issue of Cardiac Electrophysiology Clinics, edited by Drs. Mohammad Shenasa, N. A. Mark Estes III, and Gordon F. Tomaselli, will cover Contemporary Challenges in Sudden Cardiac Death. Topics covered in this issue include Pathophysiology; Basic electrophysiological mechanism; Channelopathy and Myopathy as causes of sudden cardiac death; Public access to defibrillation; Sudden cardiac death in children adolescence; Sudden cardiac death in specific cardiomyopathies; Ventricular arrhythmias and sudden cardiac death; lessons learned from cardiac implantable rhythm devices; future directions, and more.

An important review on esophageal neoplasms for the general surgeon! Topics will include epidemiology and prevalence of esophageal cancer, molecular basis of esophageal cancer development and progression, diagnosis and management of Barrett's esophagus, evaluation and staging of patients with esophageal cancer, medical evaluation of patients preparing for an esophagectomy, management of stage 1 esophageal cancer, management of T2 esophageal cancer, management of advanced stage operable esophageal cancer, management of GE junction tumors, traditional esophagectomy surgical techniques, minimally invasive esophagectomy techniques, esophageal reconstruction with alternative conduits, complications of esophagectomy, quality of life after an esophagectomy, palliation of inoperable esophageal cancer and more!

This issue of Surgical Oncology Clinics of North America, guest edited by Dr. Chandrjit P. Raut, is devoted to Sarcomas. Dr. Raut has assembled expert authors to review the following topics: Sarcoma: Histologic Subtypes and Changes in the Recent WHO Classification; Distinguishing Radiologic Characteristics of Sarcoma Histologic Subtypes; Extremity Soft Tissue Sarcoma: Tailoring Resection to Histologic Subtype; Retroperitoneal Sarcoma: Fact, Opinion, and Controversy; Breast Sarcoma; Management of Sarcoma Metastases to the Lung; Gastrointestinal Stromal Tumor; Liposarcoma: Surgical Management and Future Targeted Therapy; Myxofibrosarcoma; Malignant Peripheral Nerve Sheath Tumor; Desmoid Fibromatosis: Evolving Treatment Standards; Dermatofibrosarcoma Protuberans: Surgery v. Mohs; Radiation Therapy: Indications and Controversies for Neoadjuvant Therapy, Adjuvant Therapy, IORT, and Brachytherapy; Chemotherapy: Does Neoadjuvant or Adjuvant Therapy Improve Outcomes?; and more!

Dr. Cookson has put together topics and authors that speak to current knowledge on urinary diversion. Top experts provide timely clinical reviews on the most relevant information to urologists performing this surgery. Articles are devoted to the following topics: Patient Selection and Counseling for Urinary Diversion; Perioperative Preparation and Nutritional Considerations; Male Neobladder; Female Neobladder; Continent Cutaneous Urinary Diversion; Conduit Urinary Diversion; Metabolic and Nutritional Complications of Urinary Diversion; Surgical Complications of Continent Diversion; Intracorporeal Urinary Diversion; Secondary Tumors after Urinary Diversion; Quality of Life in Urinary Diversion; Urinary Diversion in Renal Transplant Patients; Urinary Diversion in the Pediatric Patients; and Tissue Engineering and Conduit Substitution. Readers will leave with the current information they need to manage patients surgically and clinically.

The concept of Evidence Based Medicine (EBM) has flourished in recent years and it seems that clinicians, more than ever, crave evidence from the medical literature to inform their clinical care decision making. While it is heartening that great volumes of evidence may exist, it is a daunting task to assimilate, critically review, prioritize, grade, and operationalize this crucial information. This volume of Otolaryngologic Clinics attempts to do just that. This book examines Evidence Based Practices on topics of critical importance to otolaryngologists-head and neck surgeons. The evidence has been gathered and is presented by leaders in their respective fields. Topics cover evidence-based practice of: Management of Vertigo, Management of Adult Sensory Neural Hearing Loss, Cochlear Implantation, Reflux in Sinusitis, Balloon Dilation in Otolaryngology, Postoperative Care in Endoscopic Sinus Surgery, Functional Rhinoplasty, Sublingual Immunotherapy for Allergic Rhinitis, Adult Obstructive Sleep Apnea, Pediatric Obstructive Sleep Apnea, Pediatric Tonsillectomy, Management of Vocal Cord Paralysis, Management of Hoarseness, Endoscopic Skull Base Resection for Malignancy, Management of Glottic Cancer, Management of Thyroid Cancer, and Management of NO Neck.

This issue of Clinics in Sports Medicine will cover the latest technology and techniques in partial knee arthroplasty, including the use of robotics, different types of custom implants, and advice on return-to-activity. It will also offer information on different possible outcomes and complications that could occur after surgery. This topic has not been covered in Sports Medicine in at least the past ten years, and, as it grows as a popular treatment, it should become a useful issue of CSM.

The new and updated edition of this book explains the key steps in planning and executing diagnostic test accuracy studies in dementia, serving as an introduction to the topic with clear explanations of difficulties and pitfalls. It has been fully revised in light of developments over the past 5 years and includes STARD publications which have appeared since the first edition as well as the use of biomarkers of cognitive disorders as increasingly enshrined in diagnostic criteria. The book covers the presentation of study results in terms of measures of discrimination, taking examples from studies in dementia looking at various diagnostic methods including cognitive instruments, neuroimaging, and biochemical studies. The book continues to reflect the author's own experience in diagnostic test accuracy studies, particularly in the sphere of cognitive screening instruments.. Diagnostic Test Accuracy Studies in Dementia encourages clinicians to adopt a pragmatic approach to diagnostic test accuracy studies rooted in day-to-day clinical practice.

In collaboration with Consulting Editor, Dr. Charles J. Lightdale, Guest Editor Dr. Sachin Wani has put together a state-of-the art issue that presents the latest advances in Barrett's Esophagus. He has secured expert authors who have contributed clinical reviews on the following topics: The epidemiology of Barrett's esophagus and esophageal adenocarcinoma – implications for screening and surveillance; Endoscopic screening for Barrett's esophagus and esophageal adenocarcinoma: rationale, candidates and challenges; Progress in screening for Barrett's esophagus: beyond standard upper endoscopy; Best practices in surveillance for Barrett's esophagus; Pathologic assessment of Barrett's esophagus and Barrett's related neoplasia: Do we need quality indicators; Cost effectiveness of screening, surveillance and endoscopic eradication therapies in Barrett's esophagus and early esophageal cancer; Advanced imaging and sampling in Barrett's esophagus; Artificial intelligence to the rescue; Advances in biomarkers for risk stratification in Barrett's esophagus; Current status of chemoprevention in Barrett's esophagus; Optimizing outcomes with radiofrequency frequency ablation of Barrett's esophagus: candidates, efficacy and durability; Updates in cryotherapy for Barrett's esophagus; Role of endoscopic mucosal resection and endoscopic submucosal dissection in the management of Barrett's related neoplasia; Practical approach to refractory and recurrent Barrett's esophagus; Surgical management of Barrett's related neoplasia; and Measuring Quality in Barrett's esophagus: Time to embrace quality indicators. Endoscopists will come away with the information they need to screen, diagnose, and treat patients with Barrett's Esophagus.
