Designed for undergraduate students of set theory, Classic Set Theory presents a modern perspective of the classic work of Georg

Cantor and Richard Dedekind and their immediate successors. This includes: The definition of the real numbers in terms of rational numbers and ultimately in terms of natural numbers Defining natural numbers in terms of sets The potential paradoxes in set theory The Zermelo-Fraenkel axioms for set theory The axiom of choice The arithmetic of ordered sets Cantor's two sorts of transfinite number - cardinals and ordinals - and the arithmetic of these. The book is designed for students studying on their own, without access to lecturers and other reading, along the lines of the internationally renowned courses produced by the Open University. There are thus a large number of exercises within the main body of the text designed to help students engage with the subject, many of which have full teaching solutions. In addition, there are a number of exercises without answers so students studying under the guidance of a tutor may be assessed. Classic Set Theory gives students sufficient grounding in a rigorous approach to the revolutionary results of set theory as well as pleasure in being able to tackle significant problems that arise from the theory.

Uses fold-out illustrations and simple text to introduce different textures, colors, shapes, and animals.

Constructed as a set of simple-to-follow,

step-by-step instructions, this book will take you through numerous aspects of creating a fully functional media center with your Raspberry Pi. It is an easy-to-follow yet comprehensive guide to setting a complete media center experience using the revolutionary ARM GNU/Linux board. This book does not require any prior knowledge of the Raspberry Pi, but it does assume you are computer literate and comfortable with Mac OS X, Linux, or Windows and concepts such as installing software.

Simulation Using ProModel covers the art and science of simulation in general and the use of ProModel simulation software in particular. The text blends theory with practice. Actual applications in business, services and manufacturing and a hands-on approach to simulation, including real-world simulation projects, are emphasized. The third edition of Simulation Using ProModel reflects the most recent version of the ProModel software in all the examples and labs as well as expanded coverage on generating random variates and design of experiments. Additionally, the lead author is founder and Chief Technology Advisor for ProModel Corporation.

A Ride On the Wild Side The last place Catherine MacPherson ever expected to find herself was sitting on a Greyhound bus, handcuffed to a surly bounty hunter, with

only a suitcase of her twin sister's flashy, shrink-wrap clothing to wear! Just two hours ago, the respectable schoolteacher was sitting quietly at home when this bi macho hunk crashed through her door, mistook her for her errant Miami showgirl sister, and hauled her off in his strong arms. And no matter how sexy he is, she's furious! Twins-ha! Sam McKade's the last person to ever fall for that line. He's finally got the gorgeous, leggy redhead just where he wants her-and no matter what outrageous tricks she pulls, he's not letting her get away. The problem is, she's a lot smarter-and sweeter-than he'd expected. And he's got this deep-buried tenderness she hadn't expected. And their kisses are so hot, they just might burn up ... before they sort it all out.

Tambourines to Glory, Soul Gone Home, Little Ham, Mulatto, and Simply Heavenly reflect the black author's concern with the position of the Negro in the United States

Through all the years of hardship, heartache, joy, and tragedy of life on the Kansas plains, Mercy Malloy's faith holds her family together as she copes with Indian attacks, hard work, a runaway daughter, an abandoned baby, and other trials. Original.

hostage for a month by vicious vampires, Sarah is now recovering in the most unlikely of places...the shelter that her sister, Kate and her vampire mate, Devon, opened to help such victims as herself. After months under the watchful eye of her sister, she's finally put a plan into motion to secure her future when a very imposing, very stoic and utterly drop dead gorgeous vampire takes her world by storm and turns it completely upside down.

"Ah, but that's where you're wrong, my beauty. You are mine and I've come to do exactly that." Romaric Dietrich, West Regent Vampire Lord is one of the oldest vampires alive. He's cold, calculating and nearly unmatched in power. Vampires recognize their Moiras instantaneously and upon first laying eyes on Sarah Hill, he senses she's his. His Moira. His Destined mate. The one woman meant to be his and his alone. But how is that possible when he'd loved and lost his first? In his quest to uncover the truth, not only does he discover that Sarah is indeed the other half of his soul, but he's put himself, and his mate, in the crosshairs of yet another very powerful enemy. Only bonded together do they have the power to win the battles ahead. With one look into his icy-blues, Sarah knows that Romaric is not the aloof, uncaring enigma he pretends to be. Underneath his cool, rough exterior lays a passionate, romantic and fiercely loving heart of gold. As they fight the battles to come, Sarah holds the key to not only

unlocking his centuries hardened soul, but to the one thing that will save them both from this new nemesis. But will she make her decision in time? And will they finally get the happiness they both deserve?
