This book represents a fresh and informative approach to the subject of motorcycles. In handy pocket-sized form, it chronicles 75 of the world's greatest machines.

Honda is one of the largest and most important manufacturers of motorcycles in the world. This book traces the company's development through all the major models, from the pedal cycle that marked the firm's debut in 1946 through to the powerful superbikes of the 80s and 90s.

While the history of European ompetition motorcycles has been largely dominated by Italian, British, and German marques, other builders around the continent have also played significant roles from the turn of the century to present. Arranged by nation, this book examines more than two dozen important marques, including Bultaco, CZ, Elf, Husqvarna, KTM, Ossa, Peugeot, and many others. A wealth of rare photography, including a special color section, includes candid shots of the top personalities and the bikes both at rest and at speed.

The complete story of the legenday Honda V4 motorcycles and the four-stroke engine design that gave them the name. Including full production histories, comprehensive specification details and over 250 colour illustration, the book covers design and development of the first Honda V4, the oval piston NR500, and the VF road models from 1982-1988. Also covered: the iconic sport touring bikes, the VFR750, VFR800 and VFR1200F; the worldwide racing success for Honda Racing Corporation's RC30; the 1990 Pan European/ST1100, with its longitudinal V4 engine, and the 2002 ST1300; Honda V4s in MotoGP; details of the 2014 VFR800 and CTX1300 cruiser and finally, owners' experiences and insight from those who worked in the industry. Fully illustrated with 256 colour photographs and comprehensive specification details.
