INTRODUCTION This service manual describes the latest service information for the IC-746PRO HF/VHF TRANSCEIVER. To upgrade quality, any electrical or mechanical parts and internal circuits are subject to change without notice or obligation.

A dystopian novel for the digital age, *The Word Exchange* offers an inventive, suspenseful, and decidedly original vision of the dangers of technology and of the enduring power of the printed word. In the not-so-distant future, the forecasted “death of print” has become a reality. Bookstores, libraries, newspapers, and magazines are things of the past, and we spend our time glued to handheld devices called Memes that not only keep us in constant communication but also have become so intuitive that they hail us cabs before we leave our offices, order takeout at the first growl of a hungry stomach, and even create and sell language itself in a marketplace called the Word Exchange. Anana Johnson works with her father, Doug, at the North American Dictionary of the English Language (NADEL), where Doug is hard at work on the last edition that will ever be printed. Doug is a staunchly anti-Meme, anti-tech intellectual who fondly remembers the days when people used email (everything now is text or videoconference) to communicate—or even actually spoke to one another, for that matter. One evening, Doug disappears from the NADEL offices, leaving a single written clue: ALICE. It’s a code word he devised to signal if he ever fell into harm’s way. And thus begins Anana’s journey down the proverbial rabbit hole . . . Joined by Bart, her bookish NADEL colleague, Anana’s search for Doug will take her into dark basements and subterranean passageways; the stacks and reading rooms of the Mercantile Library; and secret meetings of the underground resistance, the Diachronic Society. As Anana penetrates the mystery of her father’s disappearance and a pandemic of decaying language called “word flu” spreads, *The Word Exchange* becomes a cautionary tale that is at once a technological thriller and a meditation on the high cultural costs of digital technology.

HAam Radio collecting and history.

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled “Historical Painting Techniques, Materials, and Studio Practice” at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.
