A new, comprehensive, one volume history of Southeast Asia that spans prehistory to the present. Ricklefs brings together colleagues at the National University of Singapore whose expertise covers the entire region, encompassing political, social, economic, religious and cultural history. Opening with an account of the ethnic groups and initial cultural and social structures of Southeast Asia, the book moves through the early 'classical' states, the arrival of new global religions and the impact of non-indigenous actors. The history of early modern states and their colonial successors is followed by analysis of World War II across the region, Offering a definitive account of decolonisation and early post-colonial nation-building, the text then transports us to modern-day Southeast Asia, exploring its place in a world recovering from the financial crisis. The distinguished author team provide an authoritative and accessible narrative, drawing upon the latest research and offering detailed guidance on further reading. A landmark contribution to the field, this is an essential text for scholars, students and anyone interested in Southeast Asia.

"First published by NUS Press, National University of Singapore."

In this volume, Anthony Reid positions Southeast Asia on the stage of world history. He argues that the region not only had a historical character of its own, but that it played a crucial role in shaping the modern world. Southeast Asia ' s interaction with the forces uniting and transforming the world is explored through chapters focusing on Islamization; Chinese, Siamese, Cham and Javanese trade; Makasar ' s modernizing moment; and slavery. The last three chapters examine from different perspectives how this interaction of relative equality shifted to one of an impoverished, " third world " region exposed to European colonial power.

This book highlights the gains that a citizenship approach offers to the study of democracy in Indonesia, demonstrating that the struggle for citizenship and the historical development of democracy in the country are closely interwoven. The book arises from a research agenda aiming to help Indonesias democracy activists by unpacking citizenship as it is produced and practiced through movements against injustice, taking the shape of struggles by people at grassroots levels for cultural recognition, social and economic injustice, and popular representation. Such struggles in Indonesia have engaged with the state through both discursive and non-discursive processes. The authors show that while the state is the

common focal point, these struggles are fragmented across different sectors and subject positions. The authors thus propose that developing chains of solidarity is highly important to motivating a democracy that not only has sovereign control over public affairs, but also robust channels and organisations for political representation. In advocating the development of transformative agendas, organisations, and strategies as an important need, and an enduring challenge, for the realization of citizenship, this book is timely and relevant to the study of contemporary Indonesia's socio-political landscape. It is relevant to students and scholars in political science, anthropology, sociology, human geography and development studies. .
