The latter part of the book discusses the importance of diversity amongst plants and plant chemicals and how each plant contributes to the health of organisms within its own micro-environment. It then looks at ways to restore our natural biophilia towards plants and provides exercises and personal experiences to help us along the way.

The Lost Language of Plants: The Ecological Importance of ...

Buhner's thesis is that we have lost our sense of connection with nature, wounding ourselves and threatening ecological stability and ultimately the survival of our species. This epistemological conflict is brilliantly exposed in his chapter The End Of Antibiotics which even as a stand alone chapter is worth reading.
