The Sufis is one of the best known books on Sufism by the writer Idries Shah. First published in 1964 with an introduction by Robert Graves, it introduced Sufi ideas to the West in a format acceptable to non-specialists at a time when the study of Sufism had largely become the reserve of Orientalists. Shortly before he died, Shah

The Sufis - Wikipedia

The Idries Shah Foundation is an independent educational and cultural charity, set up by the family of the late thinker, writer, and teacher in the Sufi mystical tradition, Idries Shah, who wrote over three dozen books on topics ranging from psychology and spirituality to travelogues and culture studies. Based in London, England, the charity is primarily for the study,

work, presenting timeless ideas in a fresh and contemporary style. When the book was originally published in 1964, it launched its author, Idries Shah, on to the international stage, attracting the attention of thinkers and writers such as J. D. Salinger, Doris Lessing, Ted Hughes and Robert Graves. It introduced to the Western world concepts which have subsequently become commonly accepted, varying from the psychological importance of attention and humour, to the use of traditional tales as teaching instruments (what Shah termed 'teaching-stories'), and the historical debt owed by

the West to the Middle East in matters scientific, literary and philosophical. As a primer for the many dozens of Sufi books that Shah later produced, it is unsurpassed, offering a clear window onto a community whose system of thought and action has long concerned itself with the advancement of the whole of humankind, and whose ideas about individuals and society, their purpose and direction, need to be understood now more than ever before.

overtuned Western misconceptions of Sufism, revealing a great spiritual and psychological tradition encompassing many of the world's greatest thinkers: Sadi, Attar, Rumi, Ibn El-Arabi, El-Ghazali, Omar Khayyam, Francis of Assisi, and many others. The astonishing impact of Sufism on the development of Western civilization from the seventh century is traced through the work of Roger Bacon, John of the Cross, Raymond Lully, and Chaucer. Many of the greatest traditions, ideas, and discoveries of the West are traced to the teachings and writings of Sufi masters working centuries ago. But The Sufis is far

Used for more than seven hundred years as a teaching story, *The Book of the Book* is one of the most compelling and astonishing texts ever to emerge from the Orient. Its central premise is the simple phrase: 'When you realize the difference between the container and the content, you will have knowledge.'

cultural values. Yet, in more ways than expected, Christianity and Islam share common ground. For centuries, Sufi thinkers have been linked to both religions in certain important ideas. But, like the elephant in the dark in Jalaludin Rumi's classic fable, these ideas are not grasped in full by seizing parts of the whole and arguing for or against their supposed Christian or Islamic derivation. From a series of lectures given by Idries Shah at Geneva University, *The Elephant in the Dark* shifts focus to more fruitful ground, tracing documented episodes of cooperation and understanding between

there be clues to processes worthy of our objective consideration? First published nearly 40 years ago, *Oriental Magic* is still the definitive work on the subject. Its publication was the culmination of five years of research into rare artifacts, obscure manuscripts, and travels into remote areas where strange magical practices endure. The "singing sands" of Egypt, the invisible rulership of Sufism, subcutaneous electricity, and the prehistoric sources of Babylonian occult practices are just a few of the intriguing subjects described. The author includes personal accounts of "training"
